

Your boiler's efficiency is measured as a percentage to see how much of the fuel is used to power it e.g. gas or electricity is turned into heat.

Boilers are rated from A to G with A rated the most efficient and G rated the least efficient. The diagram on the right and table below highlight the boiler ratings and how efficient they are.

A rated boilers are the most efficient and cheapest to heat your home with over 90% of the fuel turning to heat.

F and G rated boilers are the least efficient, therefore costing you more money to heat your home.

Boiler rating	Boiler efficiency
A	90+%
B	86-90%
C	82-86%
D	78-82%
E	74-78%
F	70-74%
G	60-70%
